

SFHSS Population Health & Measurement Plan Update

Agenda

- Background & Context
- SFHSS Approach & Strategy
- Workstream Examples
- Looking Ahead

Presentation Aim:

Update the Health Service Board on Population & Social Health work at SFHSS. Encourage discussion on developing workstreams that support our members.

Background & Context

Population health is defined as the health outcomes of a group of individuals, including the distribution of such outcomes within the group.

- Kindig & Stoddard 2003

Traditional Population Health

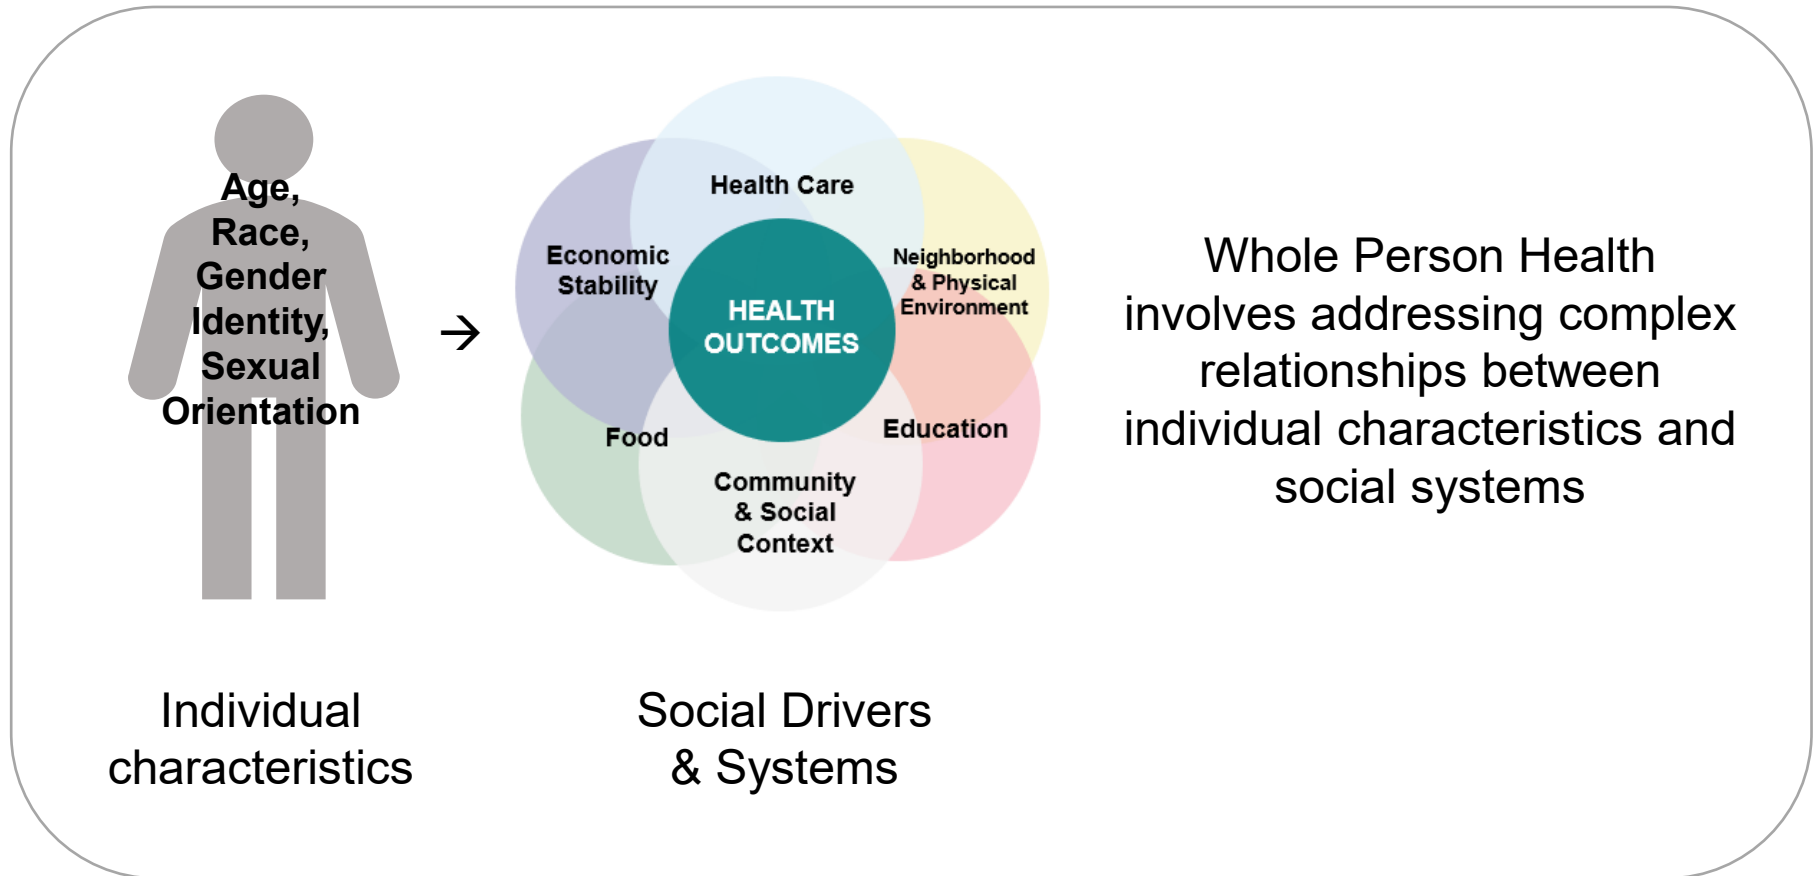

Evolving understanding of Population Health

Background & Context

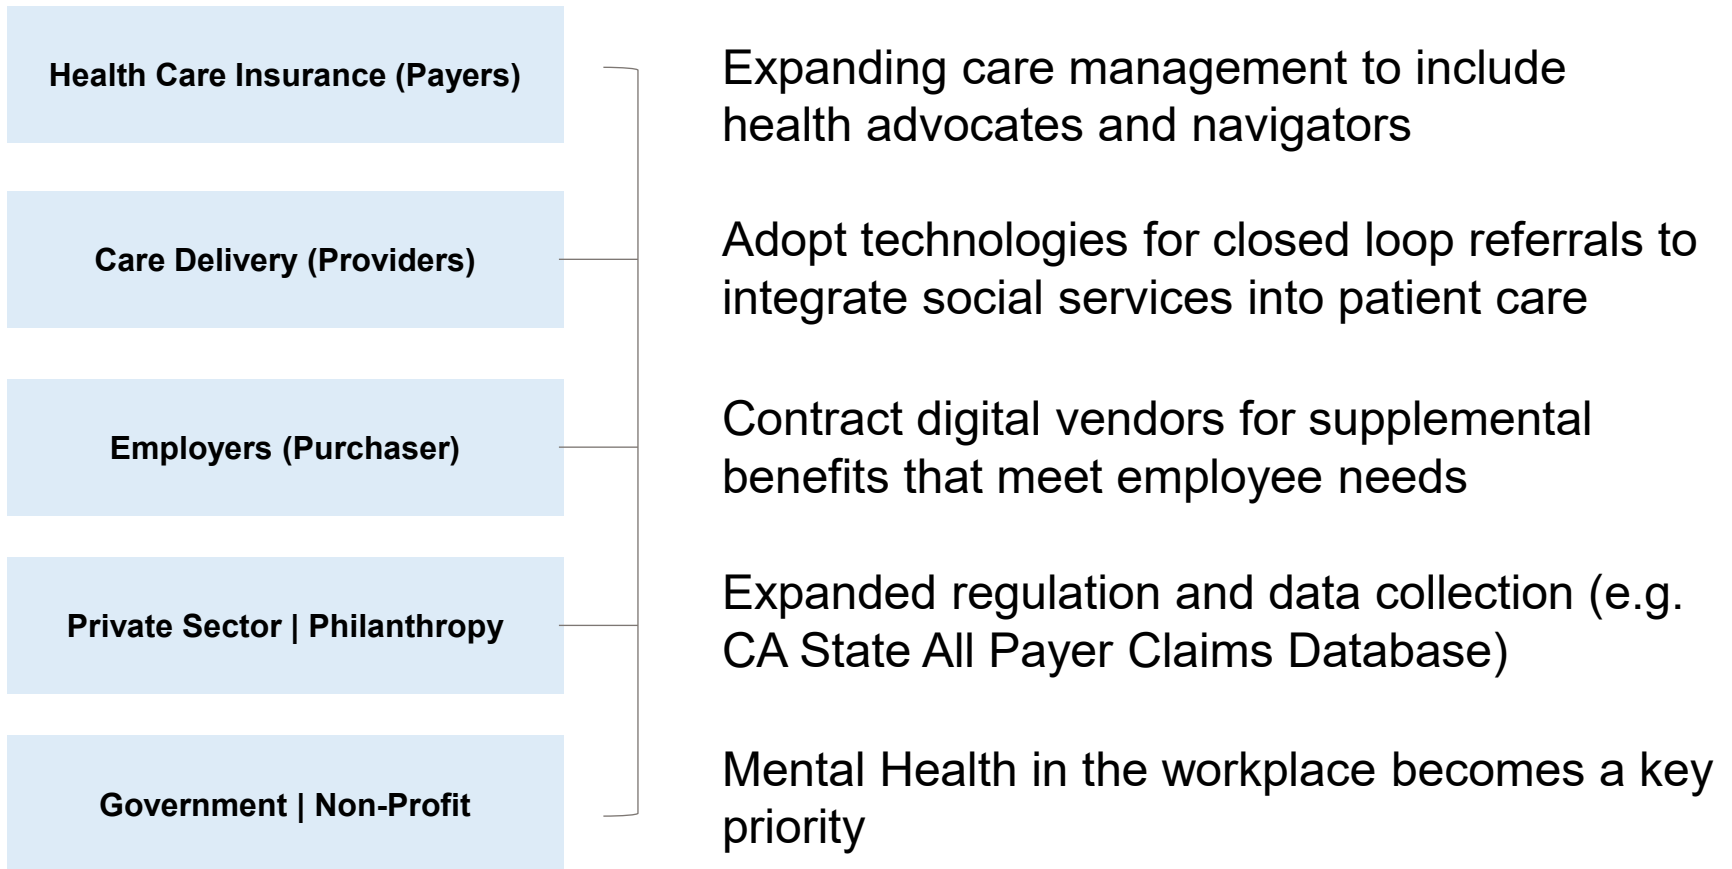

The dialogue, stakeholders & roles surrounding population health & individual wellness are evolving and often centered around equity.

Background & Context

Background & Context: Key Players and Examples

SFHSS Approach & Strategy

Guiding Questions:

- *What're we going to do about it?*
- *What is within our sphere of influence?*

Acknowledgements:

- *The SDOH and Health Equity landscape is dynamic, complex, and evolving.*
- *Systems level improvements can be slow, and outcomes difficult to measure.*
- *Change at micro and macro-levels are possible with appropriate political will, resource investment, partnerships and innovation.*

Conceptual Approach:

- *External – What can SFHSS do in partnership with key healthcare players from a purchaser's perspective?*
- *Internal – What can SFHSS and the City do from an employer's perspective?*

SFHSS Approach & Strategy

Developing Work Streams

Internal

- Regular meetings with leadership
- Project Tracker
- SDOH Inventory
- Meet with key city partners
- **Health Plan Reports Audit**
- **Data diving using claims database (Race and Department)**

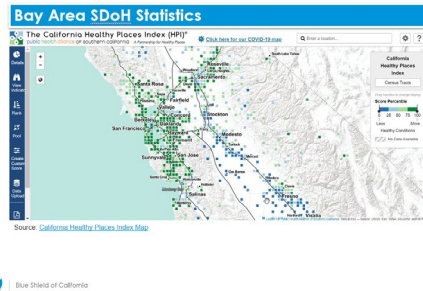

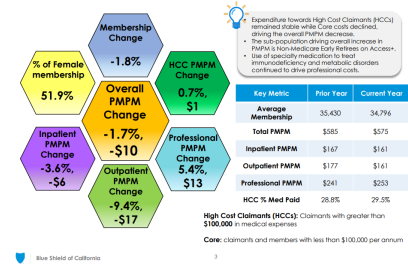

External

- **Standardized Measurement Plan**
- Participate and Engage with Plans on SDOH Pilots/Programs
- Partner with purchaser & stakeholder orgs: IHA Health Equity Committee; PBGH Advanced Primary Care Pilot

Workstream Examples: Health Plan Reports Audit

Overall Summary

Cost of Healthcare Drivers by Service Type

Service Type	Metric	Prior Year	Current Year	Trend	\$/EB	Variance to \$/EB	
Inpatient	admission/1000	22.2	17.3	-24%	14.8	3%	
	ALICE	5.4	4.2	19%	6.7	-6%	
	bed/day	\$6,336	\$4,818	-24%	\$5,485	24%	
	total/1000	\$33,250	\$42,503	26%	\$36,548	16%	
	admission/1000	12.6	11.1	-12%	11.1	0%	
	ALICE	4.9	5.4	14%	4.9	13%	
	bed/day	\$16,446	\$14,974	-9%	\$14,844	1%	
	total/1000	\$170,700	\$83,968	-51%	\$72,402	16%	
	admission/1000	9.2	8.9	-3%	10.3	-13%	
	ALICE	2.8	3.1	11%	2.8	12%	
	bed/day	\$6,939	\$7,290	5%	\$7,255	1%	
	total/1000	\$20,270	\$22,854	13%	\$20,281	13%	
Total	admission/1000	47.2	39.1	-17%	46.3	3%	
	ALICE	5.2	5.7	11%	5.6	3%	
	bed/day	\$9,214	\$8,550	-7%	\$7,568	15%	
	total/1000	\$42,482	\$49,384	16%	\$42,265	17%	
	Emergency Room	service/1000	183.3	132.3	-28%	134.0	-1%
	postservice	\$3,981	\$4,544	14%	\$4,240	7%	
Surgical	service/1000	134.4	105.5	-22%	100.6	5%	
	postservice	\$4,424	\$7,302	11%	\$7,200	1%	
	total/1000	214.9	240.1	12%	181.1	33%	
Radiology	service/1000	349.8	349.7	-0%	\$200	15%	
	postservice	114.6	104.0	-9%	91.9	13%	
	total/1000	\$300	\$499	17%	\$469	8%	
Dialysis	service/1000	1005.9	1317.8	31%	1064.1	24%	
	postservice	\$1,765	\$1,464	-17%	\$1,297	25%	
	total/1000	1836.6	1519.3	-14%	1536.4	2%	

We're receiving a large amount of robust financial, utilization and population health data from our health plans. We want to **prioritize** and **standardize** data that is **foundational** and **actionable**.

Workstream Examples: Data Dive Using Data Warehouse

We examined areas of high prevalence, cost and evidence of a disparity and found disparities of disease prevalence by race and department.

SFHSS Commercial Members (2019)		Ratio from All Race Average = 1.0				
		Asian	Black	Filipino	Hispanic	White
Behavioral	Anxiety	0.55	0.81	0.61	1.25	1.50
	Depression	0.65	1.16	0.58	1.23	1.57
Cardiovascular	Heart Failure	0.62	2.22	1.10	0.53	0.80
	Hypertension	0.85	1.60	1.44	0.95	0.83
Diabetes		1.05	1.25	1.72	1.14	0.67
MSK	Low Back	0.74	1.37	0.80	1.14	1.11
	Osteoarthritis	0.62	1.52	0.78	1.15	1.15
	Rheumatoid Arthritis	0.67	1.41	0.86	0.95	0.93
ED Visits		0.51	1.76	0.89	1.11	0.87

Workstream Examples: Standard Measurement Plan

In alignment with regulatory and purchaser groups/coalitions we're requesting that all our health plan partners submit a subset of NCQA HEDIS measures for the SFHSS membership. Measures include:

- Asthma Medication
- Childhood & Adolescent Immunization
- Colorectal Cancer Screening
- Controlling High Blood Pressure
- Depression: Screening, Monitoring, Remission
- Poor control of Diabetes
- Concurrent use of Opioids and Benzodiazepines
- Acute Hospital Utilization
- Emergency Department Visits

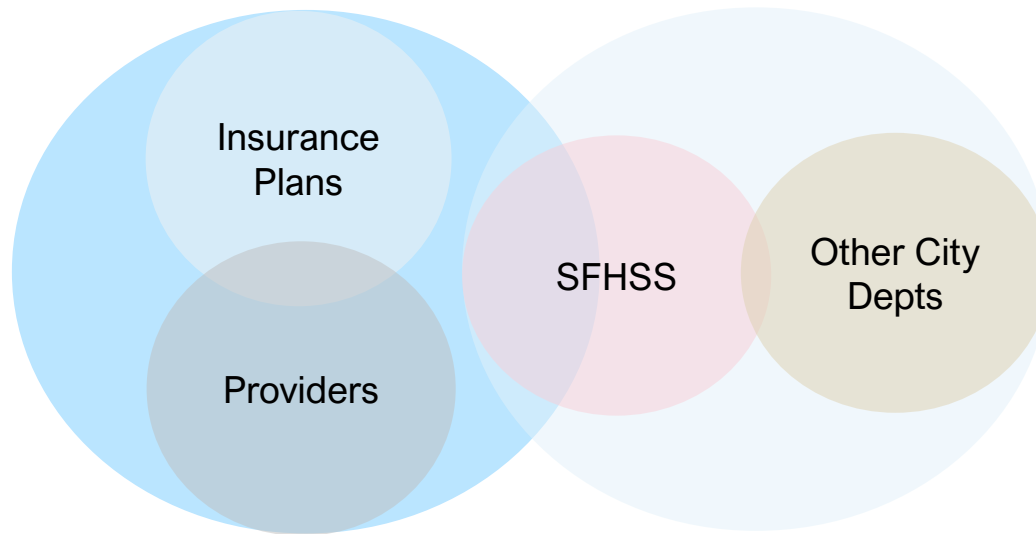

Goal: Gather data from plan partners to allow for simplified review of an endorsed set of quality and care measures, stratified by race.

SAMPLE TEMPLATE		All Members		Race/Ethnicity 1...	
		SFHSS	Benchmark*	SFHSS	Benchmark
Measure 1	Health Plan 1				
	Health Plan 2				
	Health Plan 3				
Measure 2..	Health Plan 1				

Looking Ahead: Work as a Determinant of Health

Health Care System

Employer

External strategy example:
Standard Reporting Project

Internal strategy (developing)

Summary

- Purchaser, Payer and Provider roles are expanding from the traditional population health framework to include whole person, systems and social health perspectives
- SFHSS is strategizing on our sphere of influence in the Population Health & SDOH space:
 - Efforts to improve standard data reporting by health plans
 - Engaging with stakeholders on pilots, programs and steering groups
 - Developing internal strategy (e.g., partnerships with city departments, surveying/focus groups with members, reports)
- SFHSS will continue to provide periodic updates through the Executive Director's reports and presentations

Questions & Thank you!
