OE Flu Flyer for Retirees

Fight the Flu.

Get Vaccinated.

Protect yourself and those around you by getting your flu shot.
 An annual seasonal flu vaccine is the best way to help protect against the flu. It is more important than ever to protect yourself against other respiratory illnesses and protect vulnerable populations during the flu 2023-2024 season. To find out more, visit [cdc.gov](https://www.cdc.gov).

If you're over 65, You're at Greater Risk.
 Getting a flu vaccine is an important step to protecting yourself. If you are 65 years or older, have asthma, diabetes, or chronic lung disease, you are at a higher risk for developing complications from the flu, like *pneumococcal pneumonia*. Wear a mask for an extra layer of protection.

Together, Let's Fight the Flu.
 Avoid close contact with people who are sick. Stay home when you are sick and if you need to be around others, it's highly recommended to wear a properly fitted mask to help prevent the spread of germs.

Get Your Flu Shot. Every Year.
 When you get a flu shot, you are not just protecting yourself, you're protecting your partner, family, and friends. You can't get flu from a flu shot, but it does take two weeks for the vaccine to reach to its full strength.

Wash Your Hands for 20 Seconds.
 It is important to practice good health habits like washing your hands often. If soap and water are not available, use an alcohol-based hand sanitizer.
